

Crutox

User must have the authentication / after the token

Make sure the reset password also works too.

Make sure we get to see & control the overall flow of the coin speed and also the individual user too.

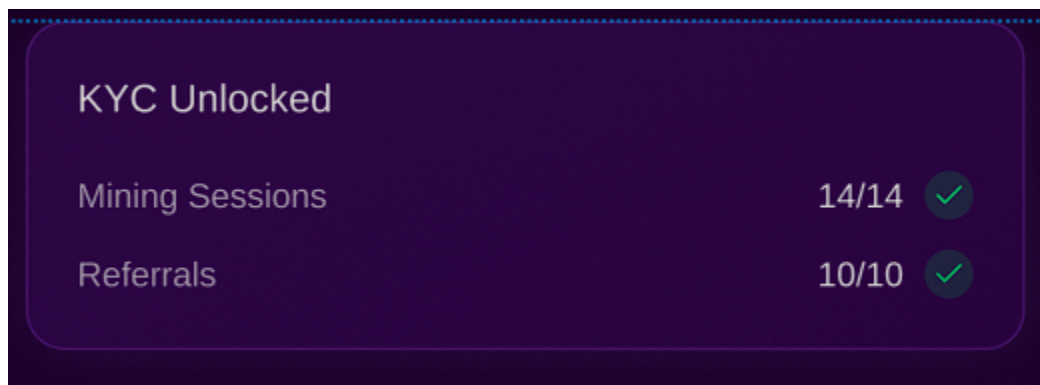

For the mystery box, we get to control the overall and see the individual one too and also make sure to have a route where when we click on any box there must be a post route so that we get to track each user one.

For the daily task too a route there be where we get to be a post route so that we get to track each user one.

Same as above for the giftcards too.

Make sure for the seperate route for each user to post kyc too.

Same for these too:

Same for the proper route where we get to manage each user – mining sessions & referrals too.
